

DALESMAN INSTAPIC

To Cure Pork, Beef or Tongues to give a dry tasty product

Ingredients	kg	lb – oz
Dalesman Instapic	4.540	10 - 00
Water	22.700	50 – 00 (5 Gallons)
Total:	27.240	60 - 00

Method of Application

- To 5 Gallons of water stir in the 10lb packet of Dalesman Instapic until it dissolves completely.
- If required, the meat can be injected with the brine at a 10% weight addition. I.e. a 10lb ham would require injecting with solution to a total weight of approximately 11lb. **Please note:** This product is not solely an injection brine & **MUST be immersed** following injection.
- Immerse the meat in the brine solution.

As an approximate guide the cure will penetrate the meat at about 1 inch per day.

Immersion Times

Pork Legs	7 – 10 days
Beef Cuts	4 – 6 days
Ox Tongues	4 – 5 days
Pigs Tongues	3 – 4 days

We recommend you visit Dalesman's website www.thedalesmangroup.co.uk to access our 'FREE' MEAT CONTENT CALCULATOR. Simply click on the QuidCalc cutie cow, enter your recipe and QuidCalc will calculate the meat content of your finished product in accordance with The Meat Product Regulations 2003.

* Important Notes

- The declared meat content is now restricted in the amount of connective tissue and fat that can be included. Where a product contains fat, gristle and skin, in excess of the maximum levels, that part of the ingredients will no longer count as meat.
- On pre-packed products excess fat, gristle and skin (connective tissue) will have to be declared in the ingredients with an indication of the species from which they are obtained.
- Mechanically recovered meat (MRM) cannot be counted as meat and must be declared separately.
- Offal cannot be counted as meat and will have to be declared separately with the name of the species. The term 'offal' cannot be used.

With reference to the above, the maximum levels allowed to be meat are: -

Species	Fat (%)	Connective tissue (%)
Mammals eg cattle, sheep goat and mixtures of species with mammals predominating	25	25
Pig	30	25
Birds and Rabbits	15	10
