

TYKE SAUSAGE ROLL MIX

| Ingredients | kg | Lb - oz |
|--|--------------|----------------|
| Meat, fat, connective tissue, offal, etc <i>As defined The Food Labelling (Amendment) (England) Regulation 2003</i> | 2.950 | 6 - 08 |
| Tyke Sausage Roll Mix | 1.590 | 3 - 08 |
| Water | 4.540 | 10 - 00 |
| Total: | 9.080 | 20 - 00 |

Method of Application

1. Mince the meat to the required size.
2. Add the dry Tyke Sausage Roll Mix and mix together. Do not use a high speed to mix these products together as this causes the starches to overwork prior to cooking.
3. Add the water steadily, mix together and then leave to stand for approximately 10 minutes.
4. Pipe the filling on to the pastry, fold over and then bake.

**Please note whilst the Sausage Roll is baking

1. The filling will swell inside the pastry giving a full sausage roll.
2. There will not be any shrink back from the ends of the sausage roll.
3. If the ends have been crimped when cut, the filling will swell, opening them and producing an attractive sausage roll.
4. The pastry will not go soggy during cooking as all the moisture is kept in the filling.

We recommend you visit Dalesman's website www.thedalesmangroup.co.uk to access our 'FREE' MEAT CONTENT CALCULATOR. Simply click on the QuidCalc cutie cow, enter your recipe and QuidCalc will calculate the meat content of your finished product in accordance with The Meat Product Regulations 2003.

* Important Notes

- The declared meat content is now restricted in the amount of connective tissue and fat that can be included. Where a product contains fat, gristle and skin, in excess of the maximum levels, that part of the ingredients will no longer count as meat.
- On pre-packed products excess fat, gristle and skin (connective tissue) will have to be declared in the ingredients with an indication of the species from which they are obtained.
- Mechanically recovered meat (MRM) cannot be counted as meat and must be declared separately.
- Offal cannot be counted as meat and will have to be declared separately with the name of the species. The term 'offal' cannot be used.

With reference to the above, the maximum levels allowed to be meat are: -

| Species | Fat (%) | Connective tissue (%) |
|--|---------|-----------------------|
| Mammals eg cattle, sheep goat and mixtures of species with mammals predominating | 25 | 25 |
| Pig | 30 | 25 |
| Birds and Rabbits | 15 | 10 |
